

STREEKS HOT FUSION HAIR EXTENSION INSTALLATION

STREEKS Hot Fusion Keratin Bond Extensions are made of the Finest Quality 100% Human Hair. STREEKS Extensions, add length, volume & highlights to your hair, and best of all they're easy to apply & last up to 4 months.

STEP 1 : PLUG IN YOUR HAIRGUN HOT FUSION CONNECTOR

To begin the installation, plug in your Hot Fusion Connector and turn the switch to the "ON" position. Allow the Fusion Connector to warm up for 5 minutes before beginning installation of the Extensions.

STEP 2 : CREATE A HORIZONTAL PART

To add LENGTH make a horizontal part 1 1/2" or 3 cm above the hairline at the base of the neck.

STEP 3 : SELECT A STRAND OF YOUR CUSTOMER'S HAIR

Select a strand of your customer's hair, and pull it through the heat shield protector disc. The amount of your customer's hair selected should be equal to the amount of hair to be added by the extension.

STEP 4 : PLACE THE EXTENSION BENEATH YOUR CUSTOMER'S STRAND

Place the Streeks extension beneath your customer's hair strand in front of the protector disc.

STEP 5 : POSITION YOUR FUSION CONNECTOR

Firmly secure your customer's strand together with the extension & place the grooved surface of the fusion connector beneath the extension's keratin bond tip.

STEP 6 : JOIN THE 2 SIDES OF THE FUSION CONNECTOR

Join the two sides of the fusion connector over the STREEKS Extension, and apply mild pressure until the keratin bond is melted to a soft gummy texture. Be sure that the inner surface of the keratin bond is fully melted, otherwise it will not bind properly to your customer's hair.

STEP 7 : REMOVE THE FUSION CONNECTOR & ROLL THE KERATIN TIP

Remove the fusion connector from your customer's hair & roll the keratin tip on the extension with your fingers until it is hard and cool and shaped like a grain of rice.

STEP 8: TRANSPOSE THE FUSION CONNECTOR TO THE NEXT EXTENSION

Transpose the Fusion Connector to the next extension, and repeat the steps above until the last extension in each row is completed & placed 1/2" or 1cm away from each side hairline.

SPACING BETWEEN THE EXTENSIONS

The average space between each extension should be about 1/4" or 1/2 cm. This will vary depending on the total number of extensions required to achieve the desired result.

CREATE ANOTHER PART & REPEAT STEPS 1-8

Create a second parallel horizontal part 1 1/2" or 3 cm above the first row & repeat steps 1 to 8 above.

INSTALLATION PATTERN

The Extensions in each row should be inserted in a checkerboard pattern when compared the row beneath it. This process should be repeated until the desired effect is reached.

TOTAL NUMBER OF ROWS

The optimal number of rows for lengthening is 5 rows: three rows below the ears, & two rows above the ears, each 1 1/2" or 3cm apart.

TOTAL NUMBER OF STREEKS PER ROW

The average number of extensions per row will vary from 10-14 in the first row, 12-16 in the second row, 14-18 in the third row, & 18-24 in the 4th & 5th rows. The total number of rows will also vary depending on the desired result.

Once completed, you & your customers will be marveling at the striking beauty of the STREEKS Hot Fusion Hair Extension System.
